In 2005, we started aluminum spinning business and continued our production rapidly by providing supplier services to domestic market brands for 3 years. In 2009, we started to produce all of the concept products ourselves.

In 2012, we tripled our painting-coating process volume thanks to our system project to turn our mechanical line into an automatic line. In 2014, we started to make teflon granite pans and pots for the same corporate companies.

As a result of the services we provide to big companies, we have received product requests from abroad. Our first export was to Azerbaijan in 2014. Currently, we export to EGYPT, GEORGIA, AZERBAIJAN, AFRICAN AND MEXICAN countries
